Re: HydraSonic™ Private Study

Dear Mr. Iaquinto:

We are pleased to announce the results of the second year study with Fletcher High School's Athletic Department to analyze the effects of **HydraSonic™** water on our student athletes involved with various sports programs during the 2016/2017 school year. Our coaching staffs with Football, Basketball, Strength & Conditioning, Wrestling and Baseball were all involved with this Private Study. They observed the student athletes who consumed **HydraSonic™** before, during and after their sporting events showed that drinking **HydraSonic™** water stopped the cramping during the games, they didn't experienced any bloating or sloshing around in their stomachs while playing and recovered faster.

In addition, we followed your recommendation to use half the Gatorade powder per serving in the 5 gallon containers. This saved us on the cost of using Gatorade during these sporting events at our school as well.

In closing, it is our opinion that drinking **HydraSonic™** water is a cutting-edge way for student athletes to re-hydrate themselves during competition. This second year study verified the first years study results as we appreciated the opportunity to participate in this unique Private Study of **HydraSonic™** water. We look forward to working with you and your company in the future!

Sincerely,
